

RDK Civils – Website Handover Pack

Domain: rdkcivils.co.uk

Project: Website build & launch

Version: 1.0

Date: 10/09/2025

Prepared by: Manodya

1) Executive summary

This handover pack documents the build and deployment of the **rdkcivils.co.uk** website. The site was developed using a PHP framework (Laravel/CodeIgniter) with Bootstrap for the frontend and MySQL for database storage. Hosting is provided via cPanel on a standard LAMP stack.

Scope delivered: Functional company website with service pages, project portfolio, and contact form.

Out of scope / known gaps: No custom CMS or admin panel included. Content updates require code/developer intervention or database edits.

2) Architecture & tech stack

Frontend: PHP Blade/Bootstrap templates

Backend: PHP 7.x/8.x (Laravel/CodeIgniter)

Database: MySQL 5.7/8.0

Hosting: cPanel shared/VPS with Apache

Dependencies: Composer packages (see `/vendor` & `composer.json`)

Environments: Single production environment on cPanel

High-level diagram:

```
[Browser] → [Apache + PHP] → [App (Laravel/CodeIgniter)] → [MySQL DB]
```

3) Access & credentials (store securely)

Share securely via password manager.

- **Registrar (domain):** <https://hpanel.hostinger.com/websites>
- **DNS:** Managed via cPanel or external (check current NS records)
- **Hosting / hPanel:** <https://hpanel.hostinger.com/websites/rdkcivils.co.uk>
- **SFTP/SSH:** host, port 22, username/password or SSH key
- **Database:** MySQL credentials in `/config/database.php` or `.env`
- **Email :** rdkcivils@outlook.com
- **SSL:** AutoSSL via cPanel (Let's Encrypt)

4) Deployment & environments

Method: File upload via SFTP/cPanel File Manager.

Database changes: Apply via phpMyAdmin or CLI.

Cache clear: `php artisan cache:clear` (if Laravel).

Build dependencies: Run `composer install` after deploying new code.

Release process:

1. Backup code & DB.
2. Upload updated files to `/public_html`.
3. Run DB migrations (if applicable).
4. Clear cache & test forms.
5. Verify SSL & redirects.

Rollback: Restore last known backup of code & DB.

5) Hosting, DNS, SSL & caching

- **Primary domain:** rdkcivils.co.uk
 - **Redirects:** www → non-www, HTTP → HTTPS via `.htaccess`
 - **DNS:** Managed through cPanel Zone Editor or registrar
 - **SSL/TLS:** AutoSSL enabled, renews automatically
 - **Caching:** Basic browser cache headers; no CDN configured
-

6) Backup & restore

- **Scope:** Codebase + database
 - **Frequency & retention:** Weekly backups + before deployments
 - **Location:** cPanel backup manager / off-site storage
 - **Restore:** Download backup, reupload files, restore DB via phpMyAdmin
-

7) Content model & editorial workflow

- **Pages:** Home, Services, Projects, About, Contact, Legal
 - **Content updates:** Require developer edits to templates or DB
 - **Media uploads:** Managed via `/public_html/uploads`
 - **Guidelines:** Optimized JPEG/PNG/WebP, ≤2MB per file
-

8) Forms & integrations

- **Contact form:** Posts to PHP endpoint
- **Delivery:** PHP `mail()` or SMTP (configured in `.env`)

- **Spam protection:** Google reCAPTCHA v2/v3 (if enabled)
 - **Data handling:** Stored only in email inbox; no database persistence
-

9) Analytics, SEO & marketing

- **Google Analytics 4:** {{Tracking ID}}
 - **Search Console:** Site verified
 - **Metadata:** Configured in Blade templates
 - **XML sitemap:** `/sitemap.xml` auto-generated
 - **Robots:** `/robots.txt` disallows `/config`, `/database`, etc.
 - **Redirects:** `.htaccess` handles legacy → new URLs
-

10) Accessibility & compliance

- **Target level:** WCAG 2.1 AA (tested manually)
 - **Checks:** Keyboard navigation, color contrast, alt text
 - **Legal pages:** Privacy Policy, Cookie Policy, Terms
-

11) Security

- **Updates:** Apply PHP security patches, update Composer packages
 - **Database access:** Restrict user permissions
 - **SSL enforced:** `.htaccess` HTTPS redirect
 - **cPanel:** 2FA enabled
 - **Error logs:** Review `/logs` regularly
-

12) Performance & monitoring

- **Uptime monitoring:** Recommend UptimeRobot
 - **Error monitoring:** Check `error_log` in cPanel
 - **Performance:** Bootstrap + PHP optimized, images compressed
-

13) Maintenance plan

- **Monthly:** Check backups, test forms, scan for malware
 - **Quarterly:** Review SSL, update PHP & Composer packages
 - **Annually:** Test disaster recovery, review DNS & hosting plans
-

14) Change management

- **Requests:** Submit via email/ticket system

- **Tracking:** {{Jira/Trello/Email log}}
 - **SLA:** Minor updates (≤ 3 days), major updates (1–2 weeks)
-

15) Training & documentation

- **Editor training:** Not required (no CMS)
 - **Admin training:** How to use cPanel, phpMyAdmin, file manager
 - **Docs included:** Deployment guide, backup/restore guide
-

16) Asset inventory

- **Logos & brand:** Stored in `/public_html/assets/img`
 - **Fonts:** Google Fonts (no license required)
 - **Images:** Client-provided (ownership with RDK Civils)
 - **Third-party libraries:** Bootstrap, Composer packages
-

17) Redirects & legacy URLs

Managed via `.htaccess` — include map if migrating from older site.

Appendices

- A. Composer dependency list (`composer.json`)
- B. Database schema (export from phpMyAdmin)
- C. Deployment runbook
- D. Backup/restore procedure
- E. SSL/hosting invoices
